University of Notre Dame Press. Paperback. Book Condition: new. BRAND NEW, **Engineering Education and Practice: Embracing a Catholic Vision**, James L. Heft, Kevin Hallinan, "Engineering Education and Practice: Embracing a Catholic Vision" is a collection of essays exploring how major themes of Catholic social teaching respect for the environment, sustainability, technological design, and service to the poor all positively affect engineering curricula, students, and faculty. Many engineering programs at American universities focus solely on developing technological sophistication without promoting ethical and humanitarian priorities. The contributors to this collection argue, however, that undergraduate engineering education needs to be broadened beyond its current narrow restrictions. The authors of this unique collection, nearly all of whom are engineers themselves, show how some Christian universities in the United States have found creative ways of opening up their engineering curricula. They demonstrate how the professional education of engineers can be enriched not only by ethical and religious themes, which are typically isolated in humanities curricula, but also by special fieldwork courses that offer hands-on service-learning opportunities and embody a rich educational synthesis. "Engineering Education and Practice" is a superb introduction to how engineering education and research should take place in Catholic or, more generally, in Christian universities. The diverse group of contributors mostly engineers and theologians who have pursued both teaching and research careers at Catholic universities with engineering schools offers an appealing combination of theoretical and practical essays. Their efforts are sure to play a role in the very rich discussion currently ongoing at every level of Christian higher education about how to retain what is distinctive about Christian higher education while making necessary reforms." David Solomon, W.P. and H.B. White Director, Notre Dame Center for Ethics and Culture, University of Notre Dame".
