Differential Geometric Methods in Mathematical Physics

By Heinz-Dietrich Doebner

Springer Aug 1985, 1985. Taschenbuch. Book Condition: Neu. 235x155x18 mm. This item is printed on demand - Print on Demand Titel. Neuware - The work of Steven M. Paneitz.- Indecomposable finite dimensional representations of the poincare group and associated fields.- The energy momentum mapping of the lagrange top.- On the momentum mapping in field theory.- An axiomatic characterization of the poincare-cartan form for second order variational problems.- Energy level distributions and chaos in quantum mechanics.- Quasi- - algebras and general weyl quantization.- Geometry of dynamical systems with time-dependent constraints and time-dependent hamiltonians: An approach toward quantization.- Regularity aspects of the quantized perturbative S-matrix in 4-dimensional space-time.- Curvature forms with singularities and non-integral characteristic classes.- Yang-mills aspects of poincaré gauge theories.- Supermanifolds and Berezin's new integral.- Spontaneous compactification and fermion chirality.- Off-shell extended supergravity in extended superspace.- Completely integrable systems of KdV-type related to isospectral periodic regular difference operators.- Non-linear techniques in two dimensional grassmannian Sigma models.- A geometrical obstruction to the existence of two totally umbilical complementary foliations in compact manifolds.- Einstein equations without killing vectors, non-linear sigma models and self-dual yang-mills theory.- Locality and uniformity in global elasticity.- Differential geometrical approach to the theory of amorphous solids.- The ising model...

Reviews

A new electronic book with a new perspective. Better then never, though i am quite late in start reading this one. Your life period will be change the instant you comprehensive looking at this pdf.
-- Dr. Constantin Marks II

Thorough information for ebook enthusiasts. It is rally fascinating throgh reading through period of time. It is extremely difficult to leave it before concluding, once you begin to read the book.
-- Hillard Macejkovic
