

Paving the Way: New York Road Building and the American State, 1880-1956

Filesize: 4.43 MB

Reviews

An exceptional ebook along with the typeface employed was intriguing to see. It really is simplistic but surprises within the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

University Press of Kansas. Hardback. Book Condition: new. BRAND NEW, Paving the Way: New York Road Building and the American State, 1880-1956, Michael R. Fein, Most historians have credited New Deal initiatives in economic regulation and social welfare policy with bringing about the modern American state. Michael Fein now reveals the surprising story of how road building paved the way to the modern state during the late nineteenth and early twentieth centuries and how public works policy emerged as a third critical pillar in support of state building."Paving the Way" shows that the growing transportation needs of a steadily industrializing nation reconfigured state politics, bringing about a revolution in governance as it reshaped the landscape. Examining state and local policy developments from half a century before the New Deal, Fein describes how the transition from rutted wagon trails to smooth highways shifted road-maintenance responsibility from local residents to state engineers. Focusing on New York State, a national leader in infrastructure development, Fein demonstrates that its citizens gradually became more comfortable with state bureaucracy because it resulted in better roads.This conferral of political legitimacy on state engineers by the general populace proved instrumental in the consolidation of engineers' power, translating their professional expertise into a new kind of politics. Fein charts five distinct road-building policy regimes to explain how a basic function of governance - providing public ways - evolved from 1880 to 1956. He also explores the contested nature of these regime changes, as cycling and automobile clubs, construction and real estate interests, hard-nosed agrarians, urban bosses, and professional engineers sought to shape highway policy to their advantage.Fein argues that these state-local power negotiations were important rehearsals for the overall centralization of bureaucratic authority in the mid-twentieth century. Although other traditionally local policy concerns such as education and social welfare...
