Walter de Gruyter, Germany, 2011. Hardback. Book Condition: New. 234 x 156 mm. Language: German . Brand New Book ***** Print on Demand *****.Which factors can be regarded as essential for the prosodic differentiation of oral text varieties? The study investigates this question on the basis of a corpus of French and Italian recordings of the text genres fairy-tale (fiaba) and radio news (giornale radio, radiojournal). After an overview of previous research, a detailed empirical survey identifies prosodic patterns specific to these text genres and tests them by means of a perception experiment. The results are discussed in a more general theoretical context of language and text perception.

This publication will never be effortless to get started on reading through but very entertaining to read through. It normally is not going to expense too much. I discovered this publication from my dad and i encouraged this book to find out.
