

## The Heavier d-Block Metals: Aspects of Inorganic and Coordination Chemistry (Paperback)

Filesize: 9.42 MB

### Reviews

*It is really an amazing pdf which i have possibly go through. Indeed, it really is play, nevertheless an amazing and interesting literature. I am just very happy to let you know that this is the best ebook i have got study in my very own life and might be he very best ebook for actually.*

## THE HEAVIER D-BLOCK METALS: ASPECTS OF INORGANIC AND COORDINATION CHEMISTRY (PAPERBACK)

[DOWNLOAD PDF](#)

Oxford University Press, United Kingdom, 1999. Paperback. Book Condition: New. 230 x 184 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This book addresses the chemistry of the second and third row d-block metals, assuming a knowledge of the chemistry of the first row metals. Chapter 1 looks at the metals and summarizes occurrence, physical properties and uses. Chapter 2 considers periodic trends in properties. Chapter 3 considers aqueous solution chemistry, species present (with comparisons of the first row metal ions) and redox properties. Chapter 4 surveys structure: the range of coordination numbers shown by second and third row metals is often a topic for discussion in University courses. Chapter 5 looks at electronic spectra and magnetic properties, making comparisons with the first row the main objective of the chapter. Detailed mathematical treatments are not given. Chapter 6 considers metal-metal bonding, and the classes of compound that contain triple and quadruple bonds; the role of bridging ligands is introduced. Chapter 7 looks at selected clusters with a pi donor ligands (e.g. metal halo species) in which metal-metal bonding is important. Chapter 8 introduces the area of polyoxometallates, closing with a short discussion of the wide range of applications. The book contains many references to encourage wider reading by the student; in addition to textbooks of relevance, the author has included many recent literature citations, and a section called Metals in Action which gives citations which show the heavier metals at work in, for example, catalytic converters and molecular wires.
