Excerpt from Elementary and Practical Algebra: In Which Have Been Attempted Improvements in General Arrangement and Exposition; And in the Means of Thorough Discipline in the Principles and Applications of the Science The following work is designed to furnish a practicable course of Algebra for the younger classes of students, without the omission of any thing important to a thorough education in the subjects which it embraces. It aims at the most methodical arrangement the clearest expositions the best elementary exercises, and the most varied and useful applications: - in all these respects presenting some new features, which have been adopted as improvements in the method of teaching this science. All that is appropriate to an Algebraic treatise in a general course of mathematical studies, or necessary in preparation for the higher works of the course, has been introduced, with the exception of a few subjects which are more exclusively preliminary to the Differential and Integral Calculus. These, with whatever else may be considered useful in a larger work. will shortly be added to the present
